

IGFBP-2 Polyclonal Antibody (Rabbit)

Description

This IGFBP-2 antibody was prepared by immunising rabbits with a 15 amino acid peptide derived from the C-terminal domain of human IGFBP-2 linked to diphtheria toxoid. The peptide sequence is located upstream of the C terminus and is unique to IGFBP-2. The antibody recognises IGFBP-2 but not IGFBP-1, 3, 4, 5, 6 or related proteins. Although the sequence is specific to human IGFBP-2, the antibody does recognise IGFBP-2 from several species, although this should be experimentally determined. The immunoglobulin fraction was purified by Protein A affinity chromatography. The antibody is suitable for use in immunoassay, immunoblotting and immunohistochemistry.

Immunogen:

Derived from UniProtKB/Swiss-Prot sequence ID P18065 human IGFBP-2. The peptide sequence is amino-acids 306-320 (IGFBP-2₂₇₀₋₂₈₄) conjugated to diphtheria toxoid.

Source:

Affinity purified rabbit antiserum

Specificity:

Recognises human and rat IGFBP-2. Specificity for other species should be determined. No cross-reactivity against IGFBP-1, 3, 4, 5 or 6.

Appearance:

Lyophilized powder

Storage/Stability:

At least 2 years at 2 - 4°C (lyophilized).
After reconstitution store at -20°C or -80°C
Avoid freeze-thaw cycles

Reconstitution:

Dissolve the vial contents in 200 µl sterile water and then dilute in a buffer suitable for the application.

Application and Titre:

Each application and titre should be determined in house.
The recommended range for use is 1:250 – 1:10,000.
